

Critical Information Summary

Residential Internet-Only Service

Information About the Service

Service Description

These are fixed broadband internet services delivered using either fibre-to-the-premises or fibre-to-the-node (FTTx) network infrastructure. Pivit delivers these services to your communications cabinet; this is our network boundary point.

Availability

Pivit's broadband internet services are available within our FTTx network infrastructure areas along with some other areas. Unless your premises is already connected to Pivit's network infrastructure you will also need to apply for installation of a lead-in cable (from the street to your premises). Pivit can coordinate this installation and will provide a quotation if required. A service establishment charge applies to establish all Pivit broadband internet services.

Minimum Term

Pivit's broadband internet services are supplied on a month-to-month or 24 month contract term.

Bundling Arrangements

Supply of this service does not require bundling with any other Pivit service. Once a broadband internet service is in place customers can change their plan to other bundled services or cancel the bundled service. Early termination charges apply as shown below (please see Information About Pricing section).

Changing to a lower value plan while in a contract period incurs a \$30 downgrade fee. Changing plans while out of contract incurs a \$55 plan change fee.

Equipment required

Customers need no additional equipment to operate Pivit's broadband internet services. The service is terminated as an Ethernet RJ45 connection. It is recommended you install a compatible router. You can purchase one from Pivit with your service request or source your own. If you need support please go to our FAQ's page at www.pivit.com.au or contact our customer service team.
